PROFILE

I am a last-year Software Engineering student graduating this year and a Full Stack Developer specializing in the **MERN stack** and **Laravel**. I am passionate about building scalable, user-centered applications and constantly strive to improve my technical skills. I excel in **problem-solving, teamwork,** and **open communication,** which allows me to collaborate effectively in any environment. My goal is to contribute innovative software solutions while continuously growing as a developer in a dynamic and forward-thinking team.

PROFESSIONAL EXPERIENCE

Omishtu Joy Tech Solutions   09/2024 – 12/2024
Junior Full Stack Developer Intern   Addis Ababa, Ethiopia

- Develop and maintain full-stack applications using Laravel, React, and various modern development tools
- Continuosly improve technical and soft skills through hands-on projects, problem-solving, and collaboration.
- Work as part on dynamic team, contributing to the development, deployment, and maintenance of scalable applications.
- Implement best coding practices, including OOP, MVC architecture, and API integration.

Virtual Assistant & Web Developer
Remote | Hired via LinkedIn

- Recruited as a Virtual Assistant to manage and apply for jobs on behalf of a client using **Upwork** and **Freelancer** platforms.
- Communicated with potential clients, identified projects matching my skills, and handled negotiations.
- Successfully completed various tasks, including e-commerce web application built with the **MERN stack**, delivering it on time and receiving positive client feedback.

PROJECTS

Debre Markos University Website Enhancement
A group project to modernize the university's outdated website by introducing dashboards for CDA, students, and admins, with social media integration and SIMS grade viewing. Built using React, TypeScript, Node.js, Express, and Tailwind CSS for a scalable and user-friendly platform.

Real Estate Listing Platform
 It allows different real estate owners to register, list their properties, and connect with potential buyers or renters seamlessly.Built as a scalable Software-as-a-Service app with Laravel 11, React, Tailwind CSS.

GymPrime
A comprehensive Gym Management System that enables users to explore plans, view trainers, and register for memberships, while admins and staff manage customers, equipment, and schedules. Built entirely with Laravel 11, providing a scalable and efficient backend for seamless fitness center operations.

Star Beauty Salon and Academy
Built as a dynamic platform with React, Redux, Tailwind CSS, It ensures a seamless experience for customers to explore services, book appointments, and register for beauty courses.

Task Management App
It is a user-friendly task management platform that helps users stay organized and productive. Users can sign up, create tasks, edit, delete, and categorize them as favorites, incomplete, or completed.
Built using React, Node.js, MongoDB, Taskify ensures a smooth and responsive experience.
